

## **Manitoba Government Lands, Waters and Environment September 2010 Updates**

This listing includes Government of Manitoba public policy statements, strategies, standards, and discussion papers regarding our lands, waters and environment which are:

- authored or released by government departments and agencies
- endorsed or adopted by the government
- released by a board, committee or body appointed by the government,
- included in basis for tenure or other decision making

The 2010 version of this listing includes more Manitoba Water, Park Plans and Environmental policies. We have added some pre 1999 policies not previously included.

Many documents and policies featured in this listing do not have “as of” dates on the policy. Manitoba government policies may only be web posted, and then only posted in sections – where there is no complete public document.

We also note that the Manitoba government web sites have no archive process, and as a result, public policies come and go without any record of what has been moved or taken off a website. Manitoba Wildlands would like to highlight the strong need for an online archive of all previous and current government policies.
