Manitoba Public Policy says a protected area is "closed by legal means to logging, mining, hydroelectric development, or any other activity that significantly and adversely affects habitat." The MB government continues its protected areas commitments and standards. Several land designations are used to establish protected areas. Most parks in Manitoba established before 1986 still have industrial development in them. Recent steps to take logging out of certain park zones have resulted in other I developments, including mines and roads moving in. Protected parks established since 1986 have no park plan, staff, or infrastructure. Recreation parks, or zones are not protected areas.
