

**OUTLINE OF EXPERT EVIDENCE OF
BERTRAND de ROCQUIGNY
ON BEHALF OF BIPOLE III COALITION**

- Mr. Bert de Rocquigny, owner of de Rocquigny Farms (CV attached) will present a report and evidence on:
 - The potential impact of Bipole III on dairy operations and crop land, specifically:
 - Manure management
 - Biological effects
 - Safety and liability
 - The placement of towers in relation to steel storage manure tanks.
 - The use of storage tanks; pumps and related equipment in the application of liquid manure.
 - The challenges of tower obstructions to liquid manure application.
 - The negative consequences of stray voltage from high voltage lines for cattle.
 - The concerns about EMF effects on beef cattle passing under transmission lines.
 - Safety issues surrounding farm equipment, including silage harvesting near and under transmission lines.
 - The size of future farm equipment in planning of tower placement.
 - Insurance liability issues.
 - Unknown long term effects of a major transmission line.
